Отчет

по лабораторной работе №3.2

«Создание таблиц базы данных PostgreSQL. Заполнение таблиц рабочими данными»

по дисциплине «**Проектирование и реализация баз данных**»

Автор: Морозов Артём Андреевич

Факультет: ТИНТ, ИКТ

Группа: К3241

Преподаватель: Говорова М.М.

Санкт-Петербург, 2023

Цель работы

Овладеть практическими навыками создания таблиц базы данных PostgreSQL 1X, заполнения их рабочими данными, резервного копирования и восстановления БД.

Практическое задание

1. Создать базу данных с использованием pgAdmin 4 (согласно индивидуальному заданию).
2. Создать схему в составе базы данных.
3. Создать таблицы базы данных.
4. Установить ограничения на данные: *Primary Key, Unique, Check, Foreign Key*.
5. Заполнить таблицы БД рабочими данными.
6. Создать резервную копию БД.

   Указание:

   Создать две резервные копии:

   - *с расширением CUSTOM для восстановления БД;*
   - *с расширением PLAIN для листинга (в отчете);*
   - *при создании резервных копий БД настроить параметры Dump options для Type of objects и Queries .*
7. Восстановить БД.

Индивидуальное задание

Вариант 3. Библиотека.

Описание предметной области: Каждая книга может храниться в нескольких экземплярах. Для каждого экземпляра известно место его хранения (комната, стеллаж, полка). Читателю не может быть выдано более 3-х книг одновременно. Книги выдаются читателям на срок не более 10 дней. В случае просрочки читателю назначается денежный штраф.
Все издания, поступающие в библиотеку, ставятся на библиотечный учет, согласно существующим требованиям. Необходимо хранить информацию, кто из сотрудников поставил экземпляр на учет.
Книги принимаются к учету на основании первичных учетных документов (накладной от поставщика, акта о приеме документов). Если документы поступают на безвозмездной основе (в результате передачи обязательных экземпляров и т. п.), оформляется акт о приеме документов. Документы, поступающие от читателей взамен утерянных и признанные равноценными утраченным, оформляются актом о приеме документов взамен утерянных.
Выбытие документов из библиотеки отражается в учете в связи с физической утратой либо утратой потребительских свойств (по причине ветхости, дефектности, устарелости по содержанию, не профильности). Не профильность издания определяется на основании профиля комплектования фонда или иного документа, утверждаемого руководителем библиотеки. При выбытии документов из библиотеки оформляется акт о списании исключенных объектов библиотечного фонда (далее – акт о списании), к которому прилагается список исключаемых объектов библиотечного фонда. В акте о списании отражаются сведения о количестве и общей стоимости исключаемых документов, а также причина списания и направление изданий после выбытия с учета. В прилагаемом к акту списке указываются:

– регистрационный номер и шифр хранения издания;
– краткое библиографическое описание;
– стоимость, зафиксированная в регистре индивидуального учета издания;
– коэффициент переоценки, стоимость после переоценки;
– общая стоимость исключаемых документов.
БД должна содержать следующий минимальный набор сведений: · Автор (фамилия и имя (инициалы) или псевдоним автора издания). · Название (заглавие) издания. · Номер тома (части, книги, выпуска). · Составитель (фамилия и имена (инициалы) каждого из составителей издания). · Язык, с которого выполнен перевод издания. · Вид издания (сборник, справочник, монография ...). · Область знания. · Переводчик (фамилия и инициалы переводчика). · Место издания (город). · Издательство (название издательства). · Год выпуска издания. · Библиотечный шифр (например, ББК 32.973). · Номер (инвентарный номер) экземпляра. · Номер комнаты (помещения для хранения экземпляров). · Номер стеллажа в комнате. · Номер полки на стеллаже. · Цена конкретного экземпляра. · Дата изъятия экземпляра с установленного места. · Номер читательского билета (формуляра). · Фамилия читателя. · Имя читателя. · Отчество читателя. · Паспортные данные. Адрес читателя (фактический). Телефон читателя. Электронная почта читателя.
Дополнить исходные данные информацией о читательском абонементе (выдаче книг).

Выполнение

Схема инфологической модели в нотации IDEF1X

Вывод

Я научился создавать бд с помощью pgAdmin4 и заполнять их данными. Также овладел навыком создания резервной копии и восстановления с ее помощью бд.
