## «НАЦИОНАЛЬНЫЙ ИССЛЕДОВАТЕЛЬСКИЙ УНИВЕРСИТЕТ ИТМО»

#### Отчет

по лабораторной работе №3 «Создание таблиц базы данных PostgreSQL. Заполнение таблиц рабочими данными»

по дисциплине «Проектирование и реализация баз данных»

Автор: Красюк К.А.

Факультет: ИКТ

Группа: К3241

Преподаватель: Говорова М.М.

Санкт-Петербург 2023

# Оглавление

Цель работы	3
Практическое задание	3
Выполнение	4
Вывод	32

## Цель работы

Овладеть практическими навыками создания таблиц базы данных PostgreSQL 1X, заполнения их рабочими данными, резервного копирования и восстановления БД.

### Практическое задание

- 1. Создать базу данных с использованием pgAdmin 4 (согласно индивидуальному заданию).
- 2. Создать схему в составе базы данных.
- 3. Создать таблицы базы данных.
- 4. Установить ограничения на данные: Primary Key, Unique, Check, Foreign Key.
- 5. Заполнить таблицы БД рабочими данными.
- 6. Создать резервную копию БД.

### Указание:

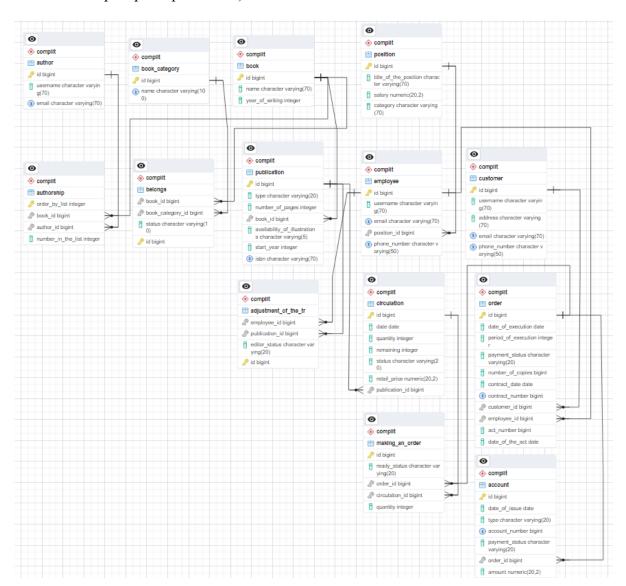

Создать две резервные копии:

- с расширением CUSTOM для восстановления БД;
- с расширением PLAIN для листинга (в отчете);
- при создании резервных копий БД настроить параметры Dump options для Type of objects u Queries .
- 7. Восстановить БД.

#### Выполнение

#### Вариант 5. БД «Издательство компьютерной литературы»

Схема логической модели базы данных, сгенерированная в Generate ERD (в соответствии с лабораторной работой 2)

#### Dump, содержащий скрипты работы с БД

```
-- PostgreSQL database dump
--

-- Dumped from database version 16.0
-- Dumped by pg_dump version 16.0
-- Started on 2023-11-10 17:03:03

### Код на Python, генерирующий случайные значения для заполнения таблиц

# Вывод

В данной лабораторной работе я овладела практическими навыками создания таблиц базы данных PostgreSQL 1X, заполнения их рабочими данными, резервного копирования и восстановления БД. Так же я устанавливала ограничения в таблицах: Primary Key, Unique, Check, Foreign Key. Познакомилась с Query Tool и утилитами pg\_Dump, pg\_Restore.
