Отчет

по лабораторной работе №3.2 «Создание таблиц базы данных PostgreSQL. Заполнение таблиц рабочими данными**»**

по дисциплине **«Проектирование и реализация баз данных»**

Автор: Кузнецов А. Г.

Факультет: ИКТ

Группа: К3240

Преподаватель: Говорова М.М.

ИТМО

Санкт-Петербург 2023

Оглавление

Цель работы

Овладеть практическими навыками создания таблиц базы данных PostgreSQL 1X, заполнения их рабочими данными, резервного копирования и восстановления БД.

Практическое задание

1. Создать базу данных с использованием pgAdmin 4 (согласно индивидуальному заданию).
2. Создать схему в составе базы данных.
3. Создать таблицы базы данных.
4. Установить ограничения на данные: Primary Key, Unique, Check, Foreign Key.
5. Заполнить таблицы БД рабочими данными.
6. Создать резервную копию БД.

   Указание:

   Создать две резервные копии:

   - с расширением CUSTOM для восстановления БД;

   - с расширением PLAIN для листинга (в отчете);

   - при создании резервных копий БД настроить параметры Dump options для Type of objects и Queries.
7. Восстановить БД.

Выполнение

Вариант 12. БД «Сессия»

Схема логической модели базы данных, сгенерированная в Generate ERD указана на рисунке 1.

Рисунок 1 – Схема логической модели базы данных.

Листинг dump'а с расширением Plaint, содержащий скрипты работы с БД

```sql
--
-- PostgreSQL database dump
--

-- Dumped from database version 16.0
-- Dumped by pg_dump version 16.0

-- Started on 2023-11-11 19:44:29

Вывод

В ходе лабораторной работы были приобретены практические навыки создания таблиц базы данных PostgreSQL 16 с использованием pgAdmin 4. Были заданы необходимые привязки и ограничения, после чего таблица была заполнена данными. Также была создана схема базы данных. заполнения их рабочими данными. Были созданы две резервные копии для полного восстановления базы данных со всей хранящейся в ней информацией.
